Excellence in Fragrance Diffusion

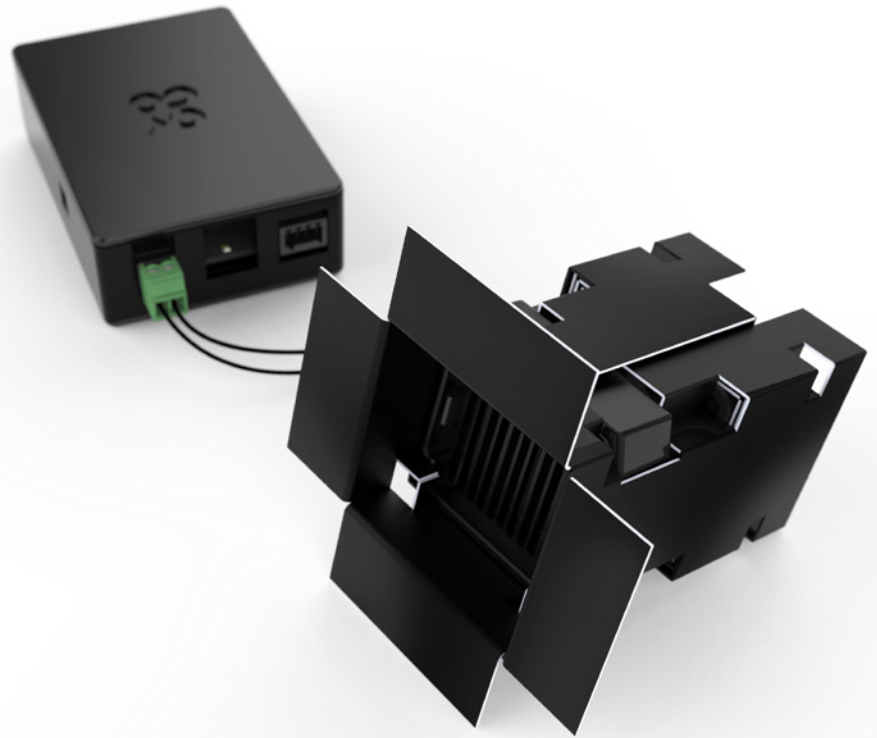

HUBBLE

CATEGORY "INVISIBLE SOLUTIONS"

Wave & Smell – Set off waves of scented sensations

The Hubble system enables contactless diffusion on demand, activated by movement near a motion sensor. The waves of fragrance thus released create a scent-filled experience.

Intuitive and easy to use, the Hubble can be installed in various configurations to facilitate the discovery of a fragrance or aromas. It operates in diffusion cycles of 30 seconds and ensures a perfect reproduction of the original scents. Multiple fragrances can be used one after the other since there is no after-scent.

- Perfect reproduction of fragrances with no after-scent
- Invisible and contactless system
- Range of 5 square meters
- Ideal for launching products, introducing fragrances to customers in shops, and for use at trade shows
- Dry diffusion technology
- Made in France
