

SCENTYS

Excellence in Fragrance Diffusion

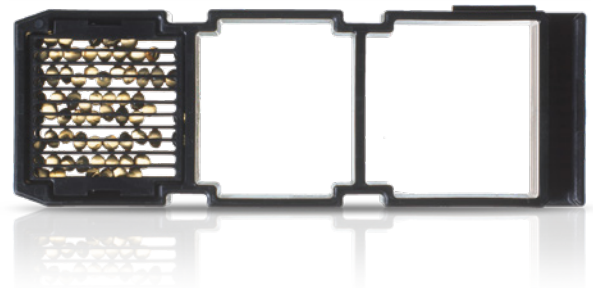

## SCENTYS BOX

CATEGORY "INVISIBLE SOLUTIONS"

The smart, multi-fragrance box

The ScentysBox allows users to diffuse up to four fragrances. They can also connect several ScentysBoxes to one another to make even more combinations possible.

The system can be controlled remotely, via software that allows users to select a fragrance, which days it is diffused and for how long. The fan can be programmed to operate at six different levels of intensity. Depending on how it is programmed, the Box can activate via a motion detector, a USB connection or a remote button. It can also be synchronized with light and sound systems. With support from Scentys engineers, this completely invisible system is adaptable to any type of architectural setup the client has in mind.

- Perfect reproduction of fragrances with no after-scent
- Invisible system
- Range of up to 50 square meters
- Ideal for product launches, events or trade shows
- Dry diffusion technology
- Made in France
